

FUTURE ENERGY LEADERS' PROGRAMME

The World Energy Council's Future Energy Leaders' Programme – the FEL-100– is designed to **inspire, grow and develop** the world's energy leaders of tomorrow. FEL-100 programme participants are invited to:

- Contribute with the World Energy Council's global energy dialogue
- Support the development of balanced policy frameworks
- Help shape energy solutions for tomorrow

The FEL community builds on creative ideas and the innovative potential of the next generation to challenge conventional thinking and explore new strategies for the future of our energy systems. It offers young professionals a unique opportunity for learning and development with exposure to critical issues in the energy debate.

As Future Energy Leader, you will:

Renewal and Diversity

Every year, around 35 new Future Energy Leaders are selected in a competitive process to join the Council's FEL-100 programme and become a member of this exclusive global network. We strive for excellence, commitment and diversity. In order to guarantee the quality and continuity of the programme, **each selected individual is initially taken on board for one year**. Afterwards the opportunity to remain in the programme is offered to those able to demonstrate commitment and involvement. At the end of their tenure, programme participants will receive a certificate and will join the FEL-Alumni community to remain part of the World Energy Council's global network.

Self-governance system

The FEL Programme emphasises the responsibility and independence of its participants. For this purpose, the FEL Board is selected among FEL-100 participants and oversees and monitors the achievement of objectives, compliance with processes, as well as the selection of new programme participants. Learn more about the [FEL Board here](#).

Meet the FEL-100 community

"For me, FEL-100 has been a great opportunity to both widen and deepen my perspective on the energy sector. Also, the programme has offered a spectacular chance to participate in the global energy dialogue. What I've enjoyed most is working with like-minded, enthusiastic energy professionals around the world, not to mention meeting new people and making friends. Based on my experience, the FEL-100 programme is a must for young professionals willing to become the energy leaders of tomorrow."

Pirjo Jantunen, Former FEL Chair

"To me, it is not a vain word to say that the FEL Programme can be a life-changing experience. Beyond the excitement of exchanging with so many bright young professionals, it is a place for concrete opportunities if you seize your chance. When I came to Daegu in 2013, I was in the process of finishing my PhD. Through the Japanese FELs, I made contact with the prestigious Research Institute of Innovative Technology for the Earth (RITE) in Kyoto. I was hired a few months later, right after I defended my PhD in Paris, and I have been working there ever since: I literally got into my dream job thanks to FEL Programme!" **Bianka Shoai Tehrani, FEL Alumni**

For more information on the programme and on how to become a Future Energy Leader please visit www.worldenergy.org or contact **Sophie Rose, Head of Future Energy Leaders Programme** (srose@worldenergy.org).
